

IoT had a very important grow in this ultimate time, because the world change for a good place and the people bought or gift "Smart things" and this need a new technologies and more people to know this, new programmers, new engineers in IoT, people to know speak english and more specialists in the area.

This image sample the "Vertical Markets" that's services independents in the world but this need's the IoT for be more practice to sale or use anything they have, the best example and that's the more use in this time is the Smart home because in the latest time the Smart divices be so bought in the market and the people want to be the life easier and the IoT have high impact in this, because the principal form this work is with internet, else someone programmed the device and other person assembled the pieces.

The IoT improved the quality of life for everyone, and the world knew how to take advantage of this and do the life easier for the people and every bussines. For me this is the most important invention in the latest time and this have a lot of progress, because the new generations have so much ideas for change the world to improve life and leave behind all current problems.
